### **Funco Motorsports Goes Green with all new Kawasaki Teryx™ Suspension Kit, Roll Cages, Bumpers and Accessories.**

**RIALTO, CA** - April 21, 2008 - Funco Motorsports has introduced a complete aftermarket product line for the 2008 Kawasaki Teryx™ UTV. The complete line features a new suspension kit featuring 14" of Wheel travel, 3 different roll cage configurations, new Pro-vented Bumper, doors and high race sides.

Known for their leading edge sand cars and championship winning UTV's, Funco manufactures race inspired suspension for all Kawasaki Teryx™ enthusiasts looking for more stability and a smoother ride. The suspension kit features 14" of wheel travel versus the Teryx™'s stock 7.5". Each chromoly tubular arm is 4" wider, for more track width and the kit features stock steering geometry for that same smooth, quick reactive steering that stock Teryx™ owners are accustomed to. Each suspension system is coated in a bright metallic silver finish for a clean look and corrosion resistance. Taming the bumps and jumps are no problem with the race-proven and tune-tested shocks by King Shock Technology. Each shock is custom valved for the Kawasaki Teryx™ and packaged with each Funco Motorsports suspension kit. The Funco Motorsports suspension kit also includes 300M high strength axles and all components to start and finish the upgrade.

Protecting the cranium is key with the all new line of Funco Motorsports Teryx™ roll cages, available in three configurations: 2 Seat Sport Cage with or without high sides, 2 Seat Race Cage, and a 4 Seat Play Cage. Each cage is manufactured of premium 1018 steel tubing, welded and coated with the Funco signature silver metallic finish. The 2 Seat Race Cage also features an integrated rear bumper to protect the tail and rear exhaust system. A new tube front bumper with pro-vented skid plate bolts to factory locations for a quick easy install.

If bolt-on products aren't enough, Funco Motorsports will create custom builds, from recreation to full desert racing, and short course racing UTV's.

#### **About Funco Motorsports:**

Founded over 40 years ago by Off-Road Hall of Fame Inductee, Gil George, Funco Motorsports is the leading manufacture of high performance sand and off-road cars. Their unique designs and family oriented service have sold over 400 Big 5 Model cars and their entry into the UTV market has been explosive too. With over 25 podium finishes in a single season, 2007 CORR UTV Pro-Mod Champions, 2007 LEMX/Podium Productions Champions, and 2nd place in the 2007 M4SX series, Funco Motorsports has proven that their experience on the track translates into quality, race-proven products for all UTV enthusiasts.
